CAREER OBJECTIVE

Full Stack Developer with 2.5+ years of experience in **Angular, React**, and **Python (Django, FastAPI)**. Skilled in building responsive UIs, RESTful APIs, and managing **MySQL/PostgreSQL** databases. Seeking to apply my skills in a challenging and growth-oriented environment. Seeking to contribute technical expertise and problem-solving skills to a dynamic development team focused on delivering impactful digital solutions.

TECHNICAL SKILLS

Languages	Python, SQL, TypeScript, JavaScript, React
Frameworks	Flask, Django ORM, FastAPI, Angular, React
Database	MongoDB, Postgress,MySQL
Cloud	EC2, S3
Tools	Apache Superset, MySQL, Git,Postgress, Pandas, Matplotlib
Plateforms	Pycharm, DBeaver, Jupyter Notebook, VSCode, Azure
Soft Skills	Problem-Resolution, Teamwork, Communication, Adaptability
Methodologies	Agile, Scrum

WORK EXPERIENCE

Front-End DEVELOPER (Client: AT&T)

Oct 2025 - Present

Plasma Softech Group

Noida, UP

- Working as a Full Stack Developer for **AT&T** projects, developing and enhancing enterprise-level web applications based on client requirements.
- Designing and implementing scalable frontend modules using **Angular**, ensuring responsive UI and seamless user experience.
- Implementing new features, optimizing existing functionalities, and resolving production issues to meet performance and reliability standards.
- Actively participating in code reviews, testing, and deployment activities to ensure high-quality and stable releases.

FULL STACK DEVELOPER (Client: PI Industries)

July 2023 - oct-2025

Atomic North Pvt ltd

Noida, UP

- Developed and maintained a web-based ERP system to automate and streamline key business operations such as finance, HR, inventory, sales, and procurement.
- Utilized React for building fast, dynamic user interfaces; Django for backend logic and database interactions; and FastAPI for developing high-performance APIs.
- Collaborated with cross-functional teams (HR, Finance, and Admin) to gather requirements, validate workflows, and align platform features with business processes.
- Consolidated data from various sources into the enterprise data warehouse and developed insightful visualizations to support business decision-making.
- Enabled data-driven analysis to better understand business operations, customer behavior, and market trends.
- Independently developed dynamic Angular-based dashboards for internal data tools using Chart.js and Apache Superset, with features like connection management, user-role administration, and permission control.

PROJECTS

AT&T Apps

- Improved frontend stability and overall user experience by identifying and resolving UI/UX issues across multiple application modules.
- Implemented responsive loading indicators to enhance perceived performance during asynchronous operations.
- Utilized cloud-native and serverless architecture to improve application scalability, optimize operational costs, and ensure high availability.

E-commerce Platform

- Contributed to frontend stability by fixing UI/UX bugs and improving user interaction flows.
- Implemented a responsive loader mechanism to enhance perceived performance during async operations.
- Added and optimized SEO tags across product pages to improve search engine visibility and ranking.
- Designed and deployed serverless solutions using **Azure Functions** to handle event-driven workflows and automated tasks.
- Managed scalable application hosting and deployment pipelines through **Azure App Service**, ensuring high availability and performance.
- Leveraged cloud-native and serverless architectures to optimize costs, improve scalability, and enhance operational efficiency.

ERP Tools

- **ABP Market Core Module:** Built foundational CRUD operations and UI workflows to support product and service listings.
- **Employee Referral Module:** Created a system for employee-led candidate referrals with approval workflows, referral tracking, and reward eligibility logic.
- **Joining Bonus Management:** Implemented a module to manage role-based joining bonuses, eligibility rules, and HR-controlled disbursements.
- **Notice Period Advance Payment:** Developed a workflow for employees to request advance salary payments during their notice period, integrated with approval chains and final settlement logic.
- Integrated **Azure Blob Storage** for secure storage and retrieval of employee documents, resumes, and compliance files across modules.

Dolphin IQ (ANPL)

- Developed various Angular screens for efficient data management.
- Sole accountability for creating insightful dashboards using Chart.js and Apache Superset.
- Features include connection management, user and role administration, and role permission assignment.
- Implemented a robust data-processing model for seamless data handling across the platform.
- Deployed the application on **Azure App Service**, leveraging serverless architecture for scalability and cost efficiency.

EDUCATION

B.Tech , GLA University	2015 - 2019
Intermediate , Simpkins School Agra	2012 - 2014
Highschool , SMK School Agra	2011 - 2012
